

PUBLIC SUBMISSION

As of: March 21, 2025
Received: February 25, 2025
Status: [REDACTED]
Tracking No. m7k-rxvq-mn1b
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-0936

Comment on FR Doc # 2025-02305

Submitter Information

Name: Sonya Skinner

Email: [REDACTED]

General Comment

Thank you for allowing this information from the Citizens of the USA. My comment deals with disclosure of data provided and the request that all contributing to the training of AI, be archived for references and the security of all. It is important to know where information or resources are located if this information is capable of affecting many and the outcomes for decisions. Audit trails should be kept and accurate. Individuals contributing information to AI must be qualified and not relying on assumptions. There should be levels of information provided based on the urgency and reason for needing answers from AI. A person should not be in fear of losing a job etc. due to the assumptions or undocumented facts obtained from AI. Responsibility and accountability are a necessity. If crimes are committed based on information provided by AI, there should be thorough investigation into who is responsible. Legal fines or in necessary imprisonment may be necessary. AI should inform at all times if it is recording information and storing personal information. Consent should be given for AI to listen in or record a person or have access to written documentation. Photos, conversations and timing used to tape should be agreed on prior to AI moving forward. A person should be allowed to hear anything which has been recorded and have the option to delete personal information. This should be done at the discretion of the person who has been recorded without consent.
