Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-0937
Comment on FR Doc # 2025-02305

Submitter Information

Name: Irene Conrad

[REDACTED]

General Comment

We need to prioritize safety, security, cybersecurity, and education in the Artificial Intelligence Action Plan.

Safety:

A detailed plan with step by step procedures need to be in place to counteract various safety issues such as lives, environmental (inside and outside), physical, fire, and extreme weather conditions.

Security and Cybersecurity:

A very detailed defense-in-depth strategy with zero trust policy (physical, network, logical, virtual, etc) needs to be in place to protect our AI infrastructure from both internal and external security and cybersecurity attacks.

Education:

We need to begin developing and deploying specialized workforce skillset by establishing various educational (elementary through college) and vocational training programs as well as apprenticeships for US citizens interested in developing, mastering, and applying artificial intelligence, safety, security, cybersecurity, and network security skills.
