Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-0940

Comment on FR Doc # 2025-02305

Submitter Information

Name: Sandra Griesman

General Comment

Dear Office of Science and Technology Policy (OSTP) and NITRD NCO Team,

As I embark on my entrepreneurial journey with SavvyTechGirl, I aim to be a trusted voice in technology, ensuring innovation serves people, not just corporations. AI is at the forefront of technological advancement, shaping industries, policies, and the future of work. While SavvyTechGirl's mission spans multiple areas of technology, AI's rapid evolution makes it critical to ensure policies encourage ethical innovation, accessibility, and support for independent tech professionals and small businesses.

AI policies must foster responsible development while ensuring opportunities in AI remain open and inclusive for all. Large corporations dominate the conversation, yet small businesses, independent innovators, and everyday users are equally impacted by AI's growth. For AI to truly benefit society, we need policies that:

1. Support Small Business Innovation – AI regulations should not create barriers that limit access for startups and independent developers. A balanced approach should encourage innovation at all levels, not just in major tech firms.
2. Ensure AI Transparency & Ethical Use – AI-driven decisions should be explainable, fair, and aligned with ethical principles that protect both businesses and consumers.
3. Invest in AI Literacy & Workforce Readiness – As AI transforms industries, education and retraining programs must be accessible to ensure a workforce that can adapt and thrive alongside technological advancements.

The AI Action Plan is a step in the right direction, but its effectiveness will depend on how inclusive and forward-thinking these policies become. I encourage the administration to work toward an AI framework that not only advances innovation but does so in a way that is ethical, accessible, and beneficial to all stakeholders in the tech ecosystem.

Thank you for the opportunity to contribute to this conversation. I look forward to seeing how AI policies evolve and impact the future of technology.

Sincerely,

Sandra Griesman
