General Comment

As an American citizen, I support the responsible and ethical development of AI that prioritizes innovation while safeguarding national security, economic growth, and individual rights. The AI Action Plan should emphasize transparency, accountability, and public-private collaboration to ensure AI benefits all Americans without unnecessary regulatory burdens. Additionally, it must include clear safeguards against biases, misuse, and threats to civil liberties. Furthermore, taxpayer-funded AI initiatives should serve the public interest, not merely enrich billionaire business owners. Government-driven advancements in AI should prioritize fair competition, open access, and broad societal benefits rather than consolidating power and profit in the hands of a few.
