

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 07, 2025
Status: [REDACTED]
Tracking No. m7z-5sms-7ev1
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1101

Comment on FR Doc # 2025-02305

Submitter Information

Name: Alexander Michael

Email: [REDACTED]

General Comment

Technology addiction is an addiction that is destroying our youth. This addiction has snowballed with advancements in AI that can predict what the user wants that they didn't even know they wanted. TikTok's algorithm is a great example of this. Every single person who attains an ID in this country needs to give up their finger print. This finger print goes into a digital database. All modern phones have fingerprint scanners. Give Meta and other companies access to the fingerprint database. Match the person's fingerprint when they sign up for Instagram. Then check their birthdate against that database lookup. If they are old enough, let them make the account. Lock that person's identity to the account. That is the easiest way to verify a person's age so they can make an account, I can think of.
