Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1173
Comment on FR Doc # 2025-02305

Submitter Information

Name: Marshall McCall

[REDACTED]

General Comment

My name is Marshall McCall, and I am a graduating senior from Avonworth High School who has spent the past year studying the ethical implications of AI in creative industries, particularly in creative writing. Through my research, I have explored how generative AI technologies can change artistic processes, including issues related to authorship, copyright, and originality. I believe the AI Action Plan should create clear rules that encourage innovation while also protecting the rights of human creators. AI has the potential to make content creation more accessible, but without proper regulation, it could harm creators' ownership of their work and increase inequality in the industry. Based on my findings, I strongly support regulations that promote transparency in AI-generated content, ensure fair compensation for artists, and prevent monopolistic practices that could limit diversity in creative fields.
