General Comment

Tech companies should have to pay to license the data they train on. They have the means and the money to do so. A number of companies have already struck deals so the proposal that it's too expensive an option is false. They essentially are afraid of being inconvenienced not disadvantaged. Let's not let these companies get lazy and destroy entire economic ecosystems on promises they may not even be able to fulfill. Keep in mind, people like Sam Altman don't have to live with their mistakes. The rest of us do. Don't let Silicon Valley determine what other people's property should be used for.
