General Comment

It is this citizen's opinion that AI is a frivolous technology that provides no material benefit to the American people. The removal of "Unnecessary burdensome requirements" amounts to wholesale gutting of copyright protections for the sole benefit of a massive corporation that seeks only to gain more profit at the expense of all. Empowering these AI models will result in unprecedented misinformation campaigns and catastrophic decay in foundational skills of students for generations to come. I wholeheartedly rebuke this push to grant special privileges to a corporation.
