General Comment

A.I. is destroying our natural environment and resources. Specifically, water and electricity production in the long and short term. It's bad enough that Trump doesn't believe in Climate Change. He's further burdening citizens with his demand for A.I. A product that routinely lies, produces no original output, and uses a Lake's worth of water for every interaction to cool the multitude of computers that power it! Life isn't the Jetsons or the Matrix. A.I. is functionally useless right now and a net negative for society. In a time of climate collapse the last thing we need is to embrace A.I. just because everyone dreams of getting money for nothing.
