Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1292

Comment on FR Doc # 2025-02305

Submitter Information

Name: Helen Lauzau

Email: [REDACTED]

General Comment

"Prevent unnecessarily burdensome requirements from hindering private sector innovation." This seems to be implying that the regulations that protect everyday Americans from being taken advantage of by the, mega corporation, private sector are in the way of unregulated AI use. This can only be at the expense of the American public.

As an artist who shares their work online, I absolutely reject the AI Action Plan. This will do harm to so many small businesses and creators, who rely on our ability to post our work to online platforms. This includes, but is not limited to, Artist, Writers, Programmers, YouTube Creators, Publishers, ect. Requirements such as copyright, help protect our work from being stolen and used without our consent. Allowing the private sector through the use of AI, to steal and use our work without consent is highly unethical and is harmful to our livelihoods. The private sector (or even the public sector) should not be allowed to use our work without permission and proper compensation. This will not "promote human flourishing, economic competitiveness" it will only fill the pockets of rich investors, while starving the working class and the poor.
