General Comment

We need strong people first regulation for AI. Opt out agreements are 1000% unacceptable, it's impossible for everyday workers to constantly check who is stealing their work for their data sets. Copyright for human work needs to be enforced ASAP or stronger laws protecting human work from tech company's profiting off our work without our consent need to be set. All current models are full of stolen work, the only acceptable path forward is to perform algorithmic disgorgement on the all the data sets containing opted in data. Completely unacceptable business model to operate on theft.
