Document: NSF_FRDOC_0001-DRAFT-1354

Comment on FR Doc # 2025-02305

Submitter Information

Name: Samantha Ramos

[REDACTED]

General Comment

I'm a stay at home, homeschooling mom who works as a blogger to make this possible. My website was hit hard with Google's AI updates. I lost 90% of my income in the last year because of it from my website. I don't think allowing Google and Open AI to scrape sites like mine for their benefit and AI training is going to do anything to help my website or business grow any more. Laws like these are going to force small publishers to give up creating content. Then what will Google have left for AI training? Nothing! This whole situation needs to be thought out in a way that doesn't leave small publishers behind but puts them first and treats them as partners. This is our content and it is copyrighted. It's not fair for Google to steal all of our hard work and force us to page 100 of searches so they can rank their AI and partners like Reddit at all the top positions. If president Trump truly wants to put families and moms like me first he will put a stop to this!
