General Comment

Government should dismantle NSF, NIH, And all such junks. Stop funding anything using tax payers' money. Too many frauds. Too many junks.

Leave scientific and technological research to private sectors.

Did Newton get any government funding for his discovery?

Did Gauss get any government funding for his research?

Did Tesla get any government funding for his work?

None.

They were all funded by private citizen sponsors who were wealthy enough and interested enough.

Leave this to private sectors. They know if any research has any values to the society. They care about their money more than you do.

Leave it to market.

Artificial Intelligence? It is nothing but a scam to screw America for a few more years while it still has some wealth left.

America used to be able to afford junk researches --- America used to be abundantly affluent. Not any more. It will go bankrupt very soon.

It is just a matter of when; not if. I expect this country will become dismantled by itself in 5 years. There will be no United States of America in 5 years. Wait and see.

Hey, let's dance while the music is playing.

Let's pull more money in our pockets while we can.

Let's eat America's corpse while it is still warm and kicking. It will be dead anyway. It is just a matter who will eat the most of its dead body. Soros, Elon Musk, Bill Gates, Warren Buffett, Chuck Shulmer, Paul Ryan, Nangcy Pelosi, or Michael Johnson? They will all get their share for sure. And they all have a place to go, like rats know the best where to jump the ship when the ship is going to sink.

but ordinary John Doe --- stay aside and weep for yourself. Who cares.

SO, why not Artificial Intelligence? These are little scammers; how much more money can they waste? It does not make any difference any way at this moment.

Great, folks. Let's join the feast while the door is open!!!
