General Comment

As a small publisher, I produce original content for my audience. However, AI models are scraping and reproducing my work without permission, threatening not just my livelihood but the future of authentic journalism and publishing.

If independent publishers and media outlets are forced out of business, there will be fewer sources of high-quality, original content. This will create a cycle where AI is left to generate content based on increasingly low-quality or outdated information, ultimately degrading public knowledge.

I urge you to establish stronger protections for small publishers, ensuring that AI companies compensate content creators fairly and operate with transparency. Without immediate action, we risk losing the diverse, well-researched, and human-driven content that is essential to a well-informed society.
