General Comment

I'm going to make this quick. This is a terrible idea. Gen AI companies like OpenAI and Midjourney have trained their programs off of art stolen from artists as well as words written by writers and others. Stop this at once. You are making a mistake. The people don't like it, it's bad for the media, it's bad for the environment, this stuff has already lost companies billions and billions of dollars. If you want Trump's approval rating to drop even more, this proposal is how you do it. No one wants this. The government has no business shoving AI in our faces. Stop it stop it stop it. This will not cause good things to happen. This is evil. Plus Gen AI generated material looks absolutely horrendous and feels more lifeless than a corpse.
