

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 14, 2025
Status: [REDACTED]
Tracking No. m89-57q9-qv46
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1410

Comment on FR Doc # 2025-02305

Submitter Information

Name: Michael Edging

[REDACTED]

General Comment

I am a published songwriter, show producer and record producer. Of course, AI is upsetting to most in my business because the fear of theft of one's creative endeavors is an ever-present possible encroachment on one's hard-earned livelihood. Having said that, I realize for America to be a leader in this realm, we are up against China and other subversives who care not a whit about individual rights or the betterment of humans on this planet. They simply wish to have power over all things and if individuals suffer or die, that is okay with them because power is their only concern.

We, as a nation, must succeed in staying ahead at this crucial time in human history. AI (Artificial Intelligence) is the watchword of our time because it is the double-edged sword of civilization's onward march to a better future. My thought is that we will have to allow AI technology to develop and we, as writers/creators, will have to allow it to study our work since AI is only as good as what it studies. It is not omnipotent, it is not divine, it is a machine. And machines are only as good as what we teach them, so we have to use the very best information available for that purpose. China won't care about our creations or our copyrights in their endeavor to overcome freedom in the world. They will steal the best and as is apparent from the past, never pay for such usage. We in the Western world have an opportunity. We can train our AI with the best we have and create in the process, hopefully, the best AI on this planet!
