General Comment

I don't think companies (especially those being investigated for being a monopoly) should be able to bypass all copyright laws to train their product (and something THEY make money from!) on creators and publishers with nothing in return for those creators and publishers. I think this would reduce the internet to whatever one company thinks should be posted, said or created. I think this would be incredibly dangerous and give way to much power to certain companies (again, who are already being investigated as a monopoly).
