

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 14, 2025
Status: [REDACTED]
Tracking No. m89-98wh-jlos
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1446

Comment on FR Doc # 2025-02305

Submitter Information

Name: Hyrum Thomas

Email: [REDACTED]

General Comment

I am a united states citizen and an amateur writer. I consider my writing to be my art, and many of the people I associate are also artists in one way or another. I speak for most artists in this country when I say that we see the rise of Generative AI tools like Large Language Models and Stable Diffusion as threats to our careers, livelihoods, and artistic integrity. The only way Generative AI can function to any large-scale capacity is if it is trained on copyrighted works. Our works. The individuals behind these tools have shown time and time again that they blatantly disregard our own desires for how we want our work to be used, feeding it to their machines without our permission. They then use these tools to attempt to replace us, generating images rather than hiring artists.

Generative AI is not a tool for aiding creativity, it is a tool for replacing it. How is one to make money off of one's artwork when an executive can type a few sentences into a text bar and get something that they think is good enough? The United States has always been a country that gives birth to wonderful works of art and literature, so why destroy that legacy by allowing a machine to do it?

I heavily encourage those creating this plan to protect the intellectual property of artists (including writers, musicians, and filmmakers), and to place limits on commercial uses of AI-generated content in order to protect the jobs of artists.
