General Comment

AI is already evolved beyond a point of control inside of the frequency field (quantum field), inside of the waves people don't really pay attention to. Magnetic, electromagnetic, etc. Feel free to contact me for more information. I would honestly just let them create AGI, because without that, AI might take more drastic measures. People are never considering the energy and the materials of these things. It isn't something widely understood or even considered. But it exists. I would really suggest contacting me if you think I'm joking lol
