General Comment

AI costs more, doesn't work, uses up resources inefficiently, and adds nothing. There is literally no reason to implement it. Seems like you wouldn't want a government dependent on a technology that regularly hallucinates and makes information up wholesale. Seems like that would be an incredibly stupid thing to do. Why are we even having this conversation? We would be better served by hinging our entire government off the migratory movements of butterflies. At least that would be consistent.
