## General Comment

AI in the US has been created using stolen copyrighted data. OpenAI and other countries broke copyright laws, have lied to investors and the public about the capabilities of AI, and aim to use these apps to reclassify skilled professions as contract work or entry level in order to break labor unions and exploit workers. The power required to run these models threaten current grid capacity and increasingly depleted water resources.

AI is scam that hurts workers, harms the environment and uses valuable water, and was built on stolen property. It is the new “self-driving” car, just utter bs from grifters.
