General Comment

Do NOT accept this plan to prioritize the development of AI. Big tech does not represent the interests of the American people, and this technology is extremely controversial among American creatives and other workers. This AI tech is built off of violating the ownership of the peoples' own work, and furthering the interests of the AI industry is harmful to all of us. Pursuing AI leadership is a threat to our own human prosperity, a threat to our own economic competitiveness, and a threat to our own national security.

The American people do not want this country to be a leader in AI development. We want this country to stop developing AI and focus on real problems, such as the price of rent and other costs of living.
