General Comment

Ai in its current form violates the rights of all creators on earth. This technology has been allowed to emerge in a completely unethical matter. To quote the creators of midjourney and stability ai "you only need to launder the data through a fine tuned codex"

"you could train on the copyrighted data and just forget you did it. Boom legal problems solved forever"

"all the best data is behind firewalls"

There is no reason to tolerate this behavior from tech companies. Enforce our rights, do your job.
