General Comment

Allowing AI to use the works of other is theft. There is no other word for it. This is anti-competitive business behavior by Big Tech to take ownership of data without permission from the owner.

It is important to protect the copyrights belonging to citizens, and not let AI steal them to train them how to copy that owner.

Google, for example. uses AI to censor speech it does not like. It does not need be offensive. It is important, now more than ever, to protect small businesses and content creators by continuing to enforce our copyright laws.
