

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 14, 2025
Status: [REDACTED]
Tracking No. m89-beq3-1hzi
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1487

Comment on FR Doc # 2025-02305

Submitter Information

Name: Anonymous Anonymous

Email: [REDACTED]

General Comment

While the pursuit of technological advancement through encouraging an incubation environment for the next great technologies is a noble pursuit. AI "models" such as Chat GPT by OPEN AI is not the way to go. AI models have been around for some time, developed using existing technologies, while utilizing a Company's datasets for their models to develop products, forecasts, and patented algorithms all in house.

What OPEN AI is doing amounts to IP and Copyright theft the likes of which hasn't been seen before at this scale. These models are created by scraping the entire internet. Any company that has uploaded anything to the internet is fair game to them, unless you've been added to a restriction list due to on going lawsuits.

Becoming the cradle for AI advancement in the US is appreciated. To advance the technology to be faster, more efficient would be welcomed. However guardrails and basic rules are needed so that other industries do not suffer. A rising tide raises all boats and what is proposed only floods them.
