General Comment

Legislation on AI protecting copyrights for human artists and writers should've happened yesterday. Big tech is training their AIs on art that the artists then receive no compensation for. Artists have always been left on the fringes but this is theft in broad daylight and as it currently stands, terrible for the environment. It brings nothing but money to those who sit on mountains of it already. Prove you absolutely don't care about humans, their financial well being, rights, and their potential by supporting AI.
