General Comment

AI companies should NOT be allowed to train (steal) copyrighted works. Current U.S. Copyright laws, as well as the Berne Convention, that protect creators, artists, musicians, writers, etc., and that protect Intellectual Property must be protected from these AI companies, otherwise the U.S. will not be able to compete in any creative arena with the rest of the world. There will be ZERO incentive for anyone to create anything of value in the U.S. anymore. AI generated slop that steals artist's work and spits out an ugly reconstituted blend of slop, does not add value, it takes away value, and most people see how ugly and lame it is. Not only will allowing AI companies to train (steal) copyrighted works, destroy the art industry, art and artists in the U.S., no one will want to buy ugly AI slop from the U.S.
