Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1518
Comment on FR Doc # 2025-02305

Submitter Information

Name: Yulia Reyes

[REDACTED]

General Comment

Dear government!

As an American citizen and an artist I beg my country to advocate for its hardworking citizens. Allowing big tech to train on copyrighted material will never put us ahead of any other country. But destroying copyright laws will allow anyone even competitors use our data. Is it worth it?

In my experience generative AI didn't bring us anything good. Lives of my peers are being destroyed by it. We are losing jobs. Children in schools no longer think critically, they'd rather believe unchecked misinformation produced by AI chatbots rather than their teachers or parents. Scientific papers are being published backed by the ghost references hallucinated by AI engines.

The Fifth Amendment to the Constitution clearly states that private property shall not be taken for public use without just compensation. My art is my property. There never was and in given circumstances can never be any just compensation when our property will be used against us to train machine that replaces us. By destroying copyright you are destroying constitutional rights of your citizens.
