As of: March 21, 2025
Received: March 14, 2025
Status: [REDACTED]
Tracking No. m89-d6xw-xvd8
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1520
Comment on FR Doc # 2025-02305

Submitter Information

Name: Katerina Petrovski

[REDACTED]

General Comment

As a small business owner, I strongly believe in the potential of AI, but I also believe in fairness and respect for intellectual property. My business is built on original content, and we work hard to produce high-quality recipes, photography, writing, and editorial work.

I employ twelve full-time team members, including chefs, photographers, writers, a financial manager, a business manager, editorial manager, and a social media manager. Together, we create original, high-value content that fuels the internet's food and lifestyle space. Like many independent publishers, my business depends on our content remaining ours—not being taken without consent or compensation.

I have two key concerns:

AI training must respect copyright law. Large companies like Google and OpenAI should not be allowed to scrape, use, or repurpose our work without explicit permission and fair compensation. Just as the music industry evolved to protect artists and ensure proper licensing, the same protections must extend to ALL publishers, not just the largest media corporations.

Tech giants must not profit from stolen content. No company should be allowed to ingest independent creators' content, censor output, control the narrative, or profit off of our work without permission. Any entity engaging in this behavior should face strict legal consequences.

We are at a pivotal moment in AI development. The choices made now will determine whether independent creators can survive or whether tech monopolies will exploit small businesses out of existence. AI cannot exist without content. And without fair compensation for content creators, the system collapses.

I urge you to take action to ensure transparency, fair licensing, and strong legal protections for small businesses like mine. It's time to make AI development sustainable for everyone, not just a handful of corporations.

Thank you for your time and consideration.

Sincerely,
Katerina
