General Comment

As an artist, I am opposed to artificial intelligence being allowed to scrape the internet and steal thousands upon thousands of people's works. AI as it is right now is completely and disgracefully underregulated- huge tech companies use it to censor dissenting opinions and spread information that is just utterly false.

60% of AI search engine answers are verifiable wrong- that shouldn't be allowed.

And AI generated images, sound and text created from copyrighted artworks/photography/literature/music can not be considered fair-use! It is theft and the companies like OpenAI should in fact be forced to erase their datasets and repay the thousands of creators they have violated the copyright of.

Do you want AI to take the jobs of many talented American creators? I sure hope not. Prevent that by enforcing copyright and regulating the machine.
