General Comment

I am an Artist working in Animation, we NEED copyright protections. What is the point of creating anything for anyone if someone can steal it and claim it as their own, and in the case of Open AI, scrape all of our hard work without consent in order to power Generative AI algorithms whose function only serves to replace human artists and creative people. Not to mention the amount of energy required to fuel these large language models. If it runs on stolen materials, it should not be allowed to run at all.
