General Comment

I am a open source developer who rely on AI . And we largely rely on open source AI models. The knowledge should be accessible by everyone to build greater things for our future generations . Anti-competitive behavior by Big Tech in the AI sector poses significant challenges to fair competition, innovation, and ethical AI development.

By controlling proprietary AI models, frameworks, and cloud infrastructure, Big Tech can lock users into their ecosystems, making it difficult for competitors to gain traction.

Now is the time to make it accessible for everyone .

Thank you !
