General Comment

As a writer and creative professional in the animation industry, I want to underscore the need for AI to have strict rules regarding the ownership of material that it can train on. AI being able to train on works not owned by the AI company and works that are under copyright amounts to theft. This theft of intellectual property undermines and degrades the work of the millions of artists, creatives, and writers in the USA. Without strict rules ensuring that AI can only train on material properly owned by the AI companies, AI will cause irreparable harm to our economy.
