Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1556
Comment on FR Doc # 2025-02305

Submitter Information

Name: Ruth Jacob-Hardage

[REDACTED]

General Comment

Creative arts of all stripes (writing, music, art, etc) will suffer tremendously if further "innovation" in the field of artificial intelligence becomes government funded and subsidized.

Creation is a cornerstone of human expression and AI will destroy every single creative industry if allowed to flourish. This would cost hundreds of thousands of Americans their jobs and livelihoods and severely dumb down the level of artistic expression in the world. No other country in the world has as wide ranging and profitable a visual arts industry as America, and that industry was not built off of algorithms. It was built by real people that will suffer from innumerable challenges if their jobs are taken away by AI.

As a creative hobbyist and taxpayer, I will not pay another dime in federal taxes if the government chooses to try and subsidize the growth of Artificial Intelligence. You're already trying your hardest to destroy the IRS too, so I'm not terribly concerned about being audited.
