## General Comment

America is an enterainment encony, and Gen AI threatens that.  
Gen AI is run off of thievery and incompetence. It produces subpar results and is So easily corruptible into incoherence. Do you think world wide box office income will continue when all we turn out is trash?  
If we let AI slop take over, then we stop being the entertainment giant we are as all we will turn out is unimpressive slop. If you want this country to flourish and maintain its tradition of being the standard by which all works are judged, you will protect the country from Gen AI crap and allow the creatives of this nation to make a living.

Human creatives are more profitable in the long run, more ethical in the short and long term and the only way to maintain our position in the world economy.

Make the techbros work for their money instead of stealing everyone else's ideas and churning out the entertainment equivalent of pig dung.
