General Comment

As a soon to be Computer Science graduate I can say that AI has destroyed my future as there aren't any jobs in my field anymore and the facts point at AI completely replacing us soon. Besides that it is highly unfair to creatives that this models are being trained on their work without their consent . If the government cares so much about protecting the interests of corporations ,then they should show the same empathy towards their citizens . AI and companies pushing it must be regulated, and copyright must be protected.
