General Comment

I am an artist-drawing, designing, and creating is my literal livelihood and how I make my living. I have not spent well over a decade of my life honing my craft only for MY personal copywrite to be violated without my consent and my work stolen and used to train generative programs that will replace my job. This is absolutely despicable and un-american to violate my privacy, my creations, and my work like this. In American, when something is created we are supposed to automatically have copyright to our creations-that's how so many great Americans have become innovators and respected creators known throughout the world-because we knew we could create and our creations would be OURS.

If you want more great Americans standing on the world stage as innovators support THEM, not the machines that steal from their labor. Do better, or lose what made this nation great in the first place.
