Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1567
Comment on FR Doc # 2025-02305

Submitter Information

Name: Julie Mann

[REDACTED]

General Comment

I believe that any development of an Artificial Intelligence plan that does not take into heavy consideration the rights of creative individuals, their creations, and the appropriate copyright of the latter, is an egregious abuse of power. AI is a tool, and it is a tool that should be heavily regulated or we risk the dissolution of any and all meaning to work that is possible solely through the creative intelligence and genius of the human mind.

AI will never be a perfect replicant of the human mind; on the contrary, whatever it creates will be a sad facsimile.

I sincerely hope SIGNIFICANT further consideration is given to any and all AI related policies, as well as to the many voices of the government's constituents (the people it is sworn to serve and listen to), who are speaking up against the blatant disregard the current administration seems to hold for the rights of individuals.
