

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 14, 2025
Status: [REDACTED]
Tracking No. m89-gxbw-1i0p
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1591

Comment on FR Doc # 2025-02305

Submitter Information

Name: Desiree Isphording

Email: [REDACTED]

General Comment

Generative AI “innovation” has been built on the labor of many thousands of creatives: artists, authors, photographers, poets, academics, etc. The vast majority of us were never provided a means to opt-out and will not be compensated for the unauthorized use of our work to train AI systems. Generative AI directly competes with the humans on whose work it depends for its output and has put many creatives out of work. As it stands, it’s already an unethical business model. Any relaxation of existing copyright laws would only compound the negative impact on human artists and authors. True innovation in creative fields requires consciousness and heart, which are things AI cannot provide.

In addition to the direct repercussions on human artists, the environmental impact of AI usage is not worth the meager shortcuts it offers.
