General Comment

Quick question: Does our presidential administration EVER get tired of lying through their teeth??

I mean, having generative AI to, "promote human flourishing, economic competitiveness, and national security"? This is the same technology infamous for misinformation, scams, plagiarizing decades of digital media, overcrowding genuine entertainment like a malignant tumor, and falsifying your own president's voice on YouTube videos too many times to count. On the point of misinformation, that same POTUS posted a generated image about Candada FEATURING THE MATTERHORN to his social media. This was from a person's whose job is literally international diplomacy, and generative AI has him knowing what he's saying even less than usual.

The American public doesn't want this useless counterfeiting technology in the same way they didn't want Orange Bin Laden supervising plane crashes (No wonder New York tried to vote him out).
