General Comment

GenAi/Ai companies only exist bc they have great marketing departments. They call stealing other people's work "Scraping" or "learning". They call the lies that their models come up with as an answer "hallucinations". The definition of taking something from someone without their permission/ consent, is stealing. This is what Ai/GenAi is doing when it's steals artists work & it's product directly competes with the artists they stole from - they are putting people out of work. GenAi/Ai companies stole TRILLIONS of dollars of work & the artists see nothing, & more often than not, have lost their jobs. GenAi/Ai is also accelerating the breakdown of our planet - between 1-50 queries on ChatGPT is equivalent to pouring out an entire liter of water & enough power to power thousands of homes — all those resources wasted just to cool a super computer. Grok requires 1,000,000 gallons of fresh water & enough electricity to power 100,000 homes for A YEAR, just to cool its super computer for 1 day. This is not sustainable. Putting people out of work & wasting our resources - GenAi/Ai is not the future.
