As of: March 21, 2025
Received: March 14, 2025
Status: [REDACTED]
Tracking No. m89-jlak-97wz
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1638

Comment on FR Doc # 2025-02305

Submitter Information

Name: Russel Braganza

[REDACTED]

General Comment

I do not support private AI companies allowed use to use copyrighted works or private works of an individual to exploit for development of these private AI companies.

AI companies are overly loud about announcing their importance to the US people and the government while being ignorant about the sheer soft-power the creative industries has for influencing the well-being of the United States and humanity in general.

Humans need to be put first in priority for their health and success, not a limited few of AI-related people.

To justify my claims, a simple question can be asked...

What do you think has more influence in the world? Art or War?

The fact that art, such as Hollywood, video game industry, animated works, illustrations, and much much more can even be compared to warfare is an indicator of the sheer importance of FREEDOM OF SPEECH brought to you by the individual voices seen through creative works.

Do not allow AI groups to shill you into thinking what we take for granted nowadays is less important than what AI groups are doing. AI will be best used as a tool for these groups, but it is not. It is being used to replace and shift majority of creative humans into struggle. I would imagine the amount of singular propaganda will increase insanely while the voices of the public will be reduced through the promotion of AI development.
