General Comment

The action taking place is a violation of the Fifth Amendment of the Constitution. According to it:

"No person shall be held to answer for a capital, or otherwise infamous crime, unless on a presentment or indictment of a Grand Jury, except in cases arising in the land or naval forces, or in the Militia, when in actual service in time of War or public danger; nor shall any person be subject for the same offence to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself; nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use, without just compensation."

That last part regarding private property is important, as trying to disable copyrighted work without payment. Also the fact that AI is not considered copyright protected does not really benefit this plan. If anything, it makes it more likely to cause degradation of the AI market and flatline it.
