## General Comment

What I think of artificial intelligence is that I see it as a threat on taking American jobs and labor, I don't see it as a positive for humanity, it's more like a curse than a blessing. AI automating jobs would displace many in this country, I really think there should be protections against AI and algorithms. to help society and restore our natural intelligence. AI can be a useful tool, and may help humanity, but I see it as a machine that driving humanity apart. I think we should never ever allow AI in the pentagon or any form of war, it is disastrous for us as a species. And I really fear AI, that is left unchecked. also I Think AI Art should be banned. even AI video generators. all jobs must be protected, Especially the Entertainment Industry from AI Period. so please regulate this technology for our species sake. please and thank you.
