Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-1655
Comment on FR Doc # 2025-02305

Submitter Information

Name: Ismael Flores

[REDACTED]

General Comment

I am writing this note as an individual to urge the administration to not go forward with the AI action plan until they provide a plan to help out small creators and businesses. Google and OpenAI are asking the government let them train on copyrighted work even if they don't own that material. Allowing them to train on copyrighted works does not let small creators and businesses to prosper, but instead, die out as big tech controls those works, never allowing new ideas to grow and prosper. And this will have dire effect on the economy as local businesses cannot compete with the wave of massive stolen works created by generative AI. Stealing creative works from Americans to train AI is un-American and it will not help us beat China in this AI arms race we are at right now.

I urge the administration to reconsider, and work with the American businesses and creators on how to advance with this AI plan, even have options available for them if they want to opt out of the AI plan.

Thank you for your time.
