General Comment

AI has been grossly misused. AI has a place but not in the generative field. It should not be used to generate as AI has no proper ability to say what is right and what is wrong as that is purely an organic mindset. Preserve copyrights in their full form, because without those protections, all writing is vulnerable, including everything that the President has "written." AI is a tool, but as we have seen, it has been abused as a tool to steal for those who are lazy and morally deprived.
