General Comment

USA will use their power leverage to scrape the whole internet and destroy creative industries of other less developing countries along with their own, which was already stifled by Woke movement. Apparently US government doesn't give a single thought to their citizens for letting a health insurance monopoly to mass murder their own citizens in their own countries. Now they will let greedy tech bros steal people's data with no constraint and obliterate their own people's livelihoods first then people from other countries later. US people can't even survive with a 9-5 job anymore. If these giant techs are handled free reign, they will drag the whole world to some place worse than Hells
