General Comment

We literally cannot afford eggs. I do not care if the President is tired of hearing it; I do not want my tax dollars or government focusing on improving AI technology. It is FAR from the primary focus I want our government to focus on, as we have folks literally being fired left and right and everyday grocery prices are raising.

We as American citizens cannot afford everyday life expenses. This is not even touching on the ecological and ethical issues of AI. We do not need or have to be the best at everything, I want us to be a functioning country.

Finally, IF we are going to put further focus into AI, I cannot emphasize how badly it needs to be regulated. There must then be a plan to enact laws to prevent from scraping data from creators or published workers without consent, recognition and compensation.

Once more: I do not want the US to put any focus on AI technologies. We do not need to be the leading power when we can't even support our citizens financially.
