General Comment

Generative AI is rife with ethical issues and is a net negative for society. At minimum, it should be better regulated. Since the tech cannot be put back in Pandora's proverbial box, it should be treated like the threat to social order and real human livelihood that it is. It harms education, entertainment, it is riddled with simple errors and incorrect answers. It is a Disinformation Agent's greatest asset, and it floods our Internet with falsehoods and immaterial junk.

Uncontrolled, it can do serious damage to humanity. Please take action accordingly.
