General Comment

I dislike this action plan solely because of Google having too much power to be able to use AI to censor publishers it doesn't coincide with its values. This is an extreme conflict of interest for those who are enacting their right for freedom of speech. Secondly, having AI train on intellectual property and having diminished copyright laws is a detriment to all companies and small creators businesses as it will create endlessly confusing brands for any third-party. Even China has copyright laws and we should maintain ours. I am overall against this plan and there are better ways to improve this technology without diminishing our intellectual property rights.
